

# SPARHAWK

Originally a trio that wrote songs on the fly, Sparhawk is three brothers and a friend. This band will take you to the mountain top and throw you off, but don't worry, there is a bed of feathers to break your fall. Frenzied and calm, how these feelings can co-exist only Sparhawk knows and they aren't saying anything. Scissor Proof's only performing band to date, their live shows are as varied as the recordings. Check 'em out kiddies.

**THE HISTORY OF AMERICA UNTIL 1804** -A collection of mostly first take recordings that cover such varied subjects as outerspace, blackouts, particle acceleration, and post-dusk driving.

**CALVIN STATION EP** - Where had Sparhawk gone? Rumors circulated that Alex moved to Florida, Aaron got a job in a soda factory, and Keith had stopped seeing people all together. Then this shadowy recording surfaced. Focused and dazed, the band had moved to a new phase. "Calvin Station" features Sparhawk playing their most complex music yet. These are sounds to fall asleep and dream to.

**BIRTHDAY GIRL single** - Sparhawk at their most catchiest. Eric makes his first recorded appearance. Engineered by Brad Gorham on the shores of Lake Ontario. Cristina O'Hara sings in a supporting role. Sweet stuff.

Aaron: proto-drumming  
Alex: low sounds

Keith: guitars, singing  
Eric: guitar, singing
